Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

Reference is made to the following document:

D1: FR-A-2 690 709

Novelty

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1 to 4 is not new in the sense of Article 33(2) PCT.

The document D1 discloses (the references in parentheses applying to this document):
A method of boring a tunnel by means of an earth pressure balance tunnel boring machine (see page 2, lines 32 to 35), comprising the injection at the cutting head of a foamed aqueous solution (see page 3, lines 10 to 14) and an aqueous solution of a water-soluble acrylic acid-based polymer (see page 5, lines 7 to 12). Thus, all the features of claim 1 are anticipated by document D1.

Also in D1 are the foamed aqueous solution and the aqueous solution of a water-soluble acrylic acid-based polymer added as a single material, as claimed in claim 2 (see page 5, lines 31 to 35).

In addition to what was pointed out in the discussion of claim 1, document D1 discloses a composition wherein sulphonates are used as an anionic surfactant (see page 4, line 29). Therefore, independent claim 3 is also not new.

A lauryl ether sulfate is also used in document D1 for a foaming solution (see page 7, line 7). Therefore, claim 4 is not new.
